

POSTMAN setup instructions for Web app

1. Download web app here: <https://chrome.google.com/webstore/detail/postman-rest-client/fdmmgilgnpjigdojojpjoooidkmcomcm?hl=en>
2. Launch app.

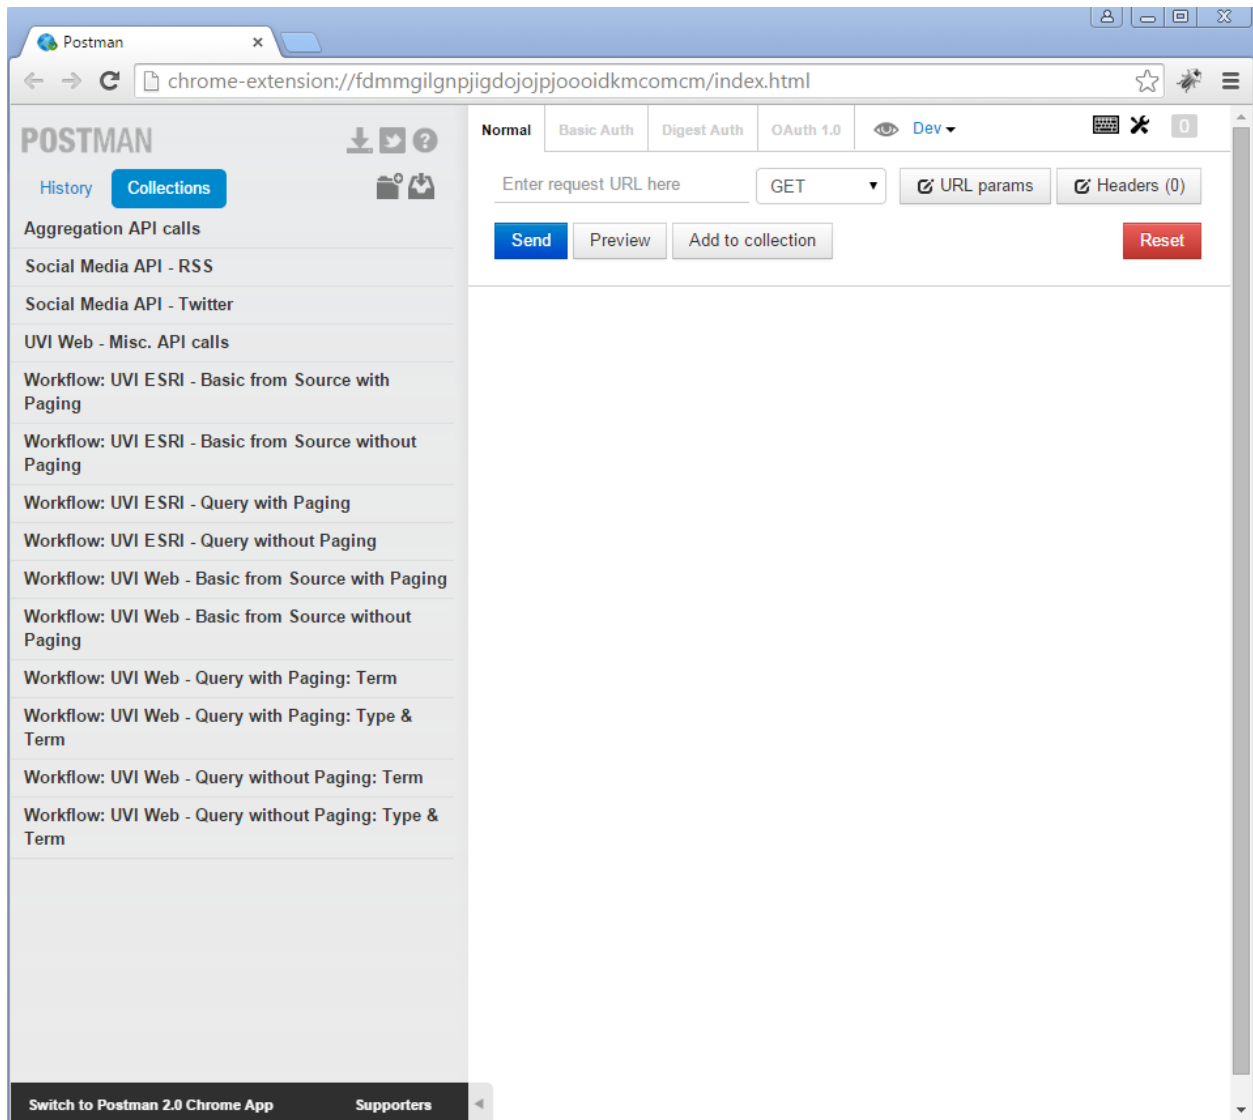

Basic app view

3. Download POSTMAN.zip.
4. Go to "No environment" -> Manage environments. *Import Beta-environment.json.txt*. Choose the environment to run against.
5. Close Manage environments. In the upper left of the page, change from *History* to *Collections*. Click *Import collection*.

Collections options

6. Import desired collection(s). Currently, there are 17 collections for IIP InsightCloud.
7. Once collections are imported, open a separate tab in chrome, and log into monacle-3. (POSTMAN does not handle CAS authentication)

[Collections added](#)

8. Run example calls!

Note: In the case of UVI POST calls, those do require some copy-paste from the user.

Note: In the case of Download GET calls, those do require some copy-paste from the user.
